

# Smartfund Growth Fund

Monthly Factsheet as at 31 October 2018

## INVESTMENT OBJECTIVE

The Fund provides investors with the potential long-term returns of an actively managed growth multi-asset portfolio managed by Smart<sup>im</sup>. Available in three currencies, sterling, euro and US dollar.

## INVESTMENT APPROACH

The risk-graded Fund is part of the Smartfund range which comprises 3 risk-graded multi-asset funds and 2 Protected multi-asset Funds. The multi-asset Portfolio at the centre of each fund is managed by Smart Investment Management (Smart<sup>im</sup>) which was established by Praemium to develop and manage a range of innovative, competitively priced discretionary investment solutions. Smart<sup>im</sup> will invest and actively manage your portfolio to allow you to take advantage of opportunities that enhance potential returns and, more importantly, to minimise the risks you face.

## KEY BENEFITS OF THE FUND

**Peace of mind:** Clients benefit from having the custody of their assets with one of the world's largest financial institutions, Morgan Stanley.

**Ease of switching:** A single range of UCITS IV funds under one roof means switching between the 'protected' and 'unprotected' range will be simple.

**Different currency options:** The unprotected funds are now available in sterling, dollars and euros.

**Focus on costs:** The underlying investments will primarily be ETFs, which has greatly reduced the cost that clients will pay for their actively managed portfolios.

## THE RISK-GRADED STRATEGY

The investments of the fund are managed by experts at Smart Investment Management (Smart<sup>im</sup>). The fund invests predominantly in equities but does use a multi-asset approach and may invest in funds to provide exposure to a wide range of asset classes which can include bonds, property, commodities, foreign exchange, alternative investments and cash. This is expected to deliver better risk-adjusted returns over the longer term than a portfolio investing in a single asset class.
