

Smartfund 80% Protected Balanced Fund

Monthly Factsheet as at 31 October 2018

INVESTMENT OBJECTIVE

The Fund's investment objective is to provide investors with the potential long-term returns of an actively managed growth multi-asset portfolio managed by Smart^{im}. Investors will have a choice of three currencies, sterling, euro and US dollar.

HOW THE SMARTFUND 80% PROTECTED RANGE WORKS

Risk-graded strategy: The risk-graded portfolio is the performance engine of the Fund, and is managed by experts and Smart Investment Management (Smart^{im}). Each portfolio has a specific risk profile and invests in a carefully constructed blend of different asset classes that can include equities, bonds, commodities, foreign exchange and alternative investments.

Protection component: The protection component partially compensates for losses on the risk-graded portfolios to ensure that at all times the Fund Net Asset Value (NAV) is above 80% of the highest fund value achieved. Gains made above the previous highest fund value continually increase the protected value.

Monthly performance cap: The Balanced Fund has a monthly performance cap range of between 3% and 4%. By having a cap in place the Fund can offer the benefits of protection while keeping the cost to a minimum. This cap is related to the Fund's investment strategy. Although it is unlikely that the Balanced Fund will breach its monthly performance cap, extreme market conditions do occur, and if the performance of the Fund does exceed the level of the cap in any calendar month then you will achieve returns in line with but not above it.

THE RISK-GRADED STRATEGY

The investments of the fund are managed by experts at Smart Investment Management (Smart^{im}). The fund invests predominantly in equities but does use a multi-asset approach and may invest in funds to provide exposure to a wide range of asset classes which can include bonds, property, commodities, foreign exchange, alternative investments and cash. This is expected to deliver better risk-adjusted returns over the longer term than a portfolio investing in a single asset class.

Source: Smart Investment Management and Morningstar. These performance figures relate to the GBP C share class of the Smartfund (ISIN IE00BYVB8C74), launched on 18 March 2016. All figures are correct as at 31 August 2018 and are net of all ongoing management charges. Due to recent regulatory restructuring a new C share class was launched on 11 September 2018. Whilst the new share class had an identical portfolio, NAV and protection level at launch the performance above relates to the original share class and is only intended to be indicative. Past performance should not be seen as a guide to future performance.
