

# Smartindex 6 - OS

Monthly Factsheet as at 31 October 2018

## Objective, Philosophy and Strategy

**Objective** - To achieve a consistent total return for a given risk profile over the longer term with a focus on preserving capital as well as maximising performance; suitable for clients prepared to invest for a minimum of 5 years who can accept capital value fluctuations in the short to medium term to achieve a higher rate of return over the longer term.

**Philosophy** - The Investment Manager believes that active management can add value and that an intensively managed 'high alpha, multi-cap' approach can provide strong risk-adjusted returns over the longer term so the portfolio is run in line with that view.

**Strategy** - The portfolio uses a multi-asset approach, primarily investing in investment funds to provide exposure to a wide range of asset classes which can include equities, fixed interest, property, commodities, alternatives and cash. Exposure to these asset classes will be sought predominately, although not exclusively, through low cost beta strategies. Where appropriate, exposure will be taken to active managers.

## Asset Allocation\*

## Volatility

	Actual 1Y	Actual 3Y
Smartindex 6 GBP	5.29%	6.25%
IA Mixed Investment 20-60% Shares TR	3.17%	3.62%
